

December 28, 2018 - Kenneth A. Casey

## 1 Our Plan:

- Notebook
- Autonomous Code
- Collection Chamber
- T-shirt Design

Dylan will work on editing previous notebook entries. Gabe and Noah will work on the autonomous program. Nathaniel will design the collection chamber. Kenny will help others and work on today's journal. Dylan will work on a design for this year's t-shirt.

## 2 What We Got Done:

- Notebook
- Autonomous Code
- Collection Chamber
- T-shirt Design

Dylan completed her previous notebook entry and drafted some T-shirt designs. Noah fixed bugs in the autonomous and found new bugs to fix. Gabe worked on the localization for the autonomous program. Nathaniel completed the design for the collector. Kenny completed this Journal entry.

## 3 What We Didn't Get Done:

- autonomous program
- Collection Chamber
- T-shirt Design

Noah and Gabe worked hard on the autonomous program, but many bugs appeared which caused it to not be finished. The collection chamber needs to be 3D printed and installed on the robot. The team needs to select a t-shirt design and order t-shirts.

### 4 Next Practice:

- Autonomous Code
- Collection Chamber
- T-shirt Design

The next practice is Thursday, January 3, 2019.). The autonomous code will be completed and tested. The collection chamber will be 3D printed. The team will select a t-shirt design.
